Door Tablet SIGNS

Cloud-based Digital Signage

What is Digital Signage

Digital signage is a form of visual communication, using screens of various sizes to show the information and content you choose to display. Signage software is one of the most popular forms of digital advertising. It can be edited or changed with ease and reaches the chosen audience with targeted messages in designated areas. Digital signage can be used in the workspace, education, public, private events or even at home.

Digital signage software is a type of content management software, CMS, used to manage digital content. It can be used to create, edit, publish and update digital signage content.

What is Door Tablet SIGNS

Door Tablet SIGNS is our full customisable digital signage solution. It allows the user to send customised content to screens, big or small. Create, edit, and remotely manage digital signage campaigns with ease. Pick and design content relevant to your subject such as the news, lunch menu, today's meetings, weather or even information such as live stocks. SIGNS also allows the user to easily add widgets like social media, videos, virtual queues, and more.

Let Door Tablet SIGNS do the talking for you

Door Tablet SIGNS is a versatile solution, here are some ways SIGNS can benefit your business:

- · Corporate: calendars, company metrics, announcements and news
- · HR: employee of the month, training procedures and company events
- Education: schedules, news, information, notices, bulletins and maps
- Digital Menu Boards: full menu, promotions, prices, images and specials
- Retail: current or upcoming sales, product information and store hours, deals
- Medical: new services, directory, insurance updates and information

Everything you need for Digital Signage

Easy to use

Our web-based studio is easy to use from any computer. With its intuitive interface, drag & drop options for over 30 one-click widgets, you can create live and engaging Content

Cloud Based

The Door Tablet SIGNS solution is fully cloud based allowing you to consume content on any display in your organisation. The only requirement is internet access, which you can easily secure

Total Content Customisation

Create from a template or start with a blank canvas. SIGNS is brand focused. Add your fonts, logo and colours or choose from a full library of multipurpose templates. For example: education retail, corporate communications, digital menus and more

Schedule your content

Create playlists, schedule content, add expiry dates, preview your content, make immediate updates and deliver this to your displays remotely

Media Statistics

Remotely monitor device status, run proof-of-play reports, media statistics

Great Support

The Door Tablet SIGNS system requires little support, in fact you are not likely to need us at all. In the event you need us we can support you right away.

Hardware Agnostic

Runs on popular OSs such as Android and Windows, including on the Door Tablet ABX device. Download our player for Android and Samsung Tizen from the downloads area on Door-Tablet.com.

Door Tablet SIGNS in the Workplace

Door Tablet SIGNS has the power to broadcast news, menus and more, but can also broadcast daily meetings or help staff find their way around the building to get to their meetings on time.

Screens can be configured to switch to different displays on a playlist. SIGNS enables the user to choose their timing preferences for each display, giving the audience the correct amount of time to absorb the information shown.

Get started with Door Tablet SIGNS

Starting with the basics

- 1. Use any smart screen or player
- 2. Create a Door Tablet account
- 3. Request access to Door Tablet SIGNS from sales@door-tablet.com
- 4. Create from a template or start with a blank canvas
- 5. Upload your images, videos or other media

- 6. Pick your widgets from the many available
- 7. Schedule your content and templates to play
- 8. Wirelessly edit, update and control your screen
- 9. Publish your playlists
- 10. Need help? You can contact us at support@door-tablet.com

Over 30 types of widgets for your Door Tablet SIGNS

Widget	Drag and Drop Widgets: Add any combination of widgets to the screens layout
Table	Import CSV to create organized and clean tables
Calendar	Create a real-time event and meetings board that sync with 0365 or XML
HTML	HTML: embed HTML into your content
